BUSINESS OVERVIEW

GPS VENTURES is a Berlin based Venture Capital firm. We invest with a long-term vision in tech startups with main focus in Germany, from seed stage and with a follow-on commitment towards growth. The investors and the investment team have a strong entrepreneurial and industrial background, and a hands-on culture with a non-bureaucratic decision making process to support our founders. Our approach is to provide sufficient funding in the first rounds while generating strong network effects and value through synergies across our ventures and industry partners. The current portfolio includes over 30 companies in a diverse number of investment areas such as: Big Data, IoT, FinTech, InsurTech, E-Commerce, Enterprise Cloud Services, Social Software, Biotech, Mobility and specialized investment funds, among others.

BUSINESS OVERVIEW

Riverside Acceleration Capital provides flexible expansion capital to B2B software and technology companies. We first work with companies at the "early-growth" stage (typically with \$3-15M ARR), who have demonstrated growth and momentum under a capital efficient cost structure, and who are looking to accelerate revenue through business expansion. We invest between \$1M-\$5M, through a unique structure that is designed to maximize alignment with company performance and strategic needs, while minimizing dilution. With this model, our primary method of repayment/return is generated via a capped revenue share (averaging 5% of revenue until approximately 1.6-1.8x our original investment is returned). We can provide follow-on capital of the same form or through a more traditional growth capital investment in future rounds. Along...

BUSINESS OVERVIEW

EMK is a UK based private equity fund which invests in businesses where it can support growth and change. In partnering with EMK, businesses and management teams get access to more than just capital – we work together to generate ideas on how to take a business forward and act as a catalyst for delivering change.

We have the capability to commit over £100m of equity to a single investment from our fund and in partnership with our limited partners we could commit far more should a portfolio company require that through the life of an investment.

BUSINESS OVERVIEW

Grazia Equity is one of the leading venture capital investors in Germany. The company has been supporting a large number of mostly young companies, often from their foundation to the Initial Public Offering or eventual sale. Grazia's success derives from a partnership with extraordinarily strong entrepreneurial teams to turn them into international market leaders. In contrast to other venture capital firms, Grazia predominantly works with own capital that the partnership invest as entrepreneurs. Grazia's portfolio companies profit from the wide entrepreneurial background of its partner team as well as a far-reaching international network. Grazia focuses on investments in Europe and in particular, Germany; in selected circumstances the company co-invests in the USA. Grazia has invested early in category leaders such as...

BUSINESS OVERVIEW

Earlybird is a European venture investment firm. It manages around US\$1 billion in assets for an international investor base since 1998, focusing mainly on the technology and health technology sectors. The firm is one of the largest European venture and growth capital investors and the largest outside of the UK.

Earlybird's investment philosophy is to focus on non-linear companies that disrupt large markets with a strong product or technology at their heart. Earlybird is particularly interested in companies that build engagement or network effects, and that reach proof points and scalability with a high degree of capital efficiency. Earlybird looks for investment opportunities with European DNA but global ambition.

BUSINESS OVERVIEW

Piton is a venture capital fund investing in businesses with network effects – marketplaces, exchanges and platforms.

At volume a marketplace aggregates the demand of buyers and the supply of sellers of goods or services, and also organizes the important information around its type of transaction in the most intuitive and efficient way. This creates competitive advantages that do not exist at a small scale – selection, price transparency, and depth – a classic network effect.
