## BUSINESS OVERVIEW

Riverside Acceleration Capital provides flexible expansion capital to B2B software and technology companies. We first work with companies at the "early-growth" stage (typically with \$3-15M ARR), who have demonstrated growth and momentum under a capital efficient cost structure, and who are looking to accelerate revenue through business expansion. We invest between \$1M-\$5M, through a unique structure that is designed to maximize alignment with company performance and strategic needs, while minimizing dilution. With this model, our primary method of repayment/return is generated via a capped revenue share (averaging 5% of revenue until approximately 1.6-1.8x our original investment is returned). We can provide follow-on capital of the same form or through a more traditional growth capital investment in future rounds. Along...
